

The Mews Performance 2015

By the end of 2015, 16 service users had been discharged as follows:

The chart above shows 9 people (56%) moved into their own homes with some care provision, 5 people (31%) moved to a step-down facility and 2 people (13%) moved into long term residential care

This means that 87% required less intensive and therefore lower cost care provision when they were discharged.
